AUTOPULSE 220-M3

New pulse MIG/MAG generator

Single-phase power supply + PFC (Power Factor Correction)

Numerical technology for improved processing speed

New colour display with 3 levels of interface

57 synergy settings for a large choice of combinations

Dedicated compartment to keep the aluminium reel separate

Supplied with 3 torches

- Welding quality comparable to 3-phase machines
- Adjustable welding output between 15 and 220 A
- 5 welding modes including Cold Pulse
- Storage for up to 500 welding programs
- In line with vehicle manufacturers requirements

ref. 036703
