

GYSPOT 32D.X is a convenient equipment for car body welding. This traditional A.C. spot-welder performs quality spot welds with new body car steel including high strength steel. Thanks to its new electronics controller, programming is very easy. In automatic mode, the user needs only to select steel thickness. In manual mode, the user programs the welding time and the welding current. The aluminium made clamp is lightweight and easy to handle. The clamping force can reach 500 daN with 7 bar air pressure. This A.C. spot welder has an excellent ratio price/performance.
